

FRANCISCO FERREIRA

SUMARY

Curious but focused mind. Interested in achieving a better world through technology, although anything that can help is more than welcome. A software developer passionate about technology, who wants to absorb as much knowledge and experience as possible.

EXPERIENCE

Software Developer (Intern), 03/2022 - 07/2022

Aptiv - Lisbon, Portugal

- I worked with the Python language and some of its libraries and frameworks.
- I was put in charge of additional tasks to help the team succeed.
- I was assigned the development of a dashboard, whose purpose was to facilitate the viewing and data management of the projects that are being developed within the company.

Cinema Worker, 06/2021 - 11/2021

Cinema City - Alfragide, Lisbon, Portugal

- At the cinema, I performed numerous tasks, such as customer service, cleaning, checking movie theaters and providing food and drinks.
 - In cinema I developed some skills such as:
 - How to prepare and deliver food in the most correct way to customers;
 - How to organize the cleaning of an establishment;
 - How to manage the bar's daily stock;
 - How to work in a team and sometimes even lead the team;
 - How to work under pressure.
-

PROJECTS

• Cinema website

I developed a website, where it would be possible to see the films on display, see their schedules and purchase tickets for those same films. For the development of this project, I used C# as the back-end language, and for the front-end of the site, I used HTML, CSS and a little JavaScript. I still used a SQL database that I created just for this project.

• PFTLX-Client (Bar Code Verification)

Within the Aptiv company, I developed an application in the python language in the tkinter interface, where it was possible to read a bar code referring to a product of the company, and then the application gave a "feedback" to the operator if everything was "ok or not" and if

EDUCAÇÃO

Technical course - Level 4, Computer systems management and programming technician, 2022

Inete - Instituto de Educação Técnica
- Lisbon, Portugal

SKILLS

- Project management;
 - Computer architecture;
 - Some programming languages such as: C++, C#(.Net), HTML, CSS, Python (Django);
 - SQL database;
 - Web Design;
 - Microsoft Tools;
 - Customer interaction;
 - Cordial posture;
 - Proactivity;
 - Confidence and security at work;
 - Patience;
 - Keep active listening;
 - Efficient use of time;
 - Articulated communication;
 - Teamwork.
-

then I could go ahead and continue to make the product. In other words, the application was used to verify if a given product was "ok or not", when it is being prepared by the operator. For this project it was also necessary to have a server and to program this server for the application, the server existed but was developed by another person within the company.

• **Projects Manger Panel**

Also at Aptiv I developed a software/dashboard for the management and administration of the company's projects. The software was developed in order to facilitate and help the data management of the projects that would be developed by the company. In this project I used the Python language and the Django framework (python, html and css).
